MAS Audit & Analysis

## OPERATIONS TEAM

MAS Audit and Analysis (MAS) is an alliance of telecommunications professionals creating a team to meet all aspects of your operational needs. MAS works as an extension of your telecommunications infrastructure to bring the specific talents you need when and where required.

Our team is headed by a trio of professionals with a combination of over 75 years of experience in the industry.

**Paul Chatlin is an Expert in Audit Discrepancy and Contract Negotiation.** Paul is a graduate of Michigan State University. He worked in the telecom vendor environment for 9 years as a National Account Manager for Sprint Communications. He has since represented Clients as a consultant for Communication Advisors Incorporated for 14 years. Paul brings persistence and tenacity to your team that gets results without damaging your ability to work with the vendor(s) after the project is complete.

**Our Technical Expert is a true professional in all aspects of Data and Voice Transport Capabilities.** His vast experience in the industry includes 20 years of PBX Installation and Repair for Michigan Bell (currently AT&T). He represented AT&T as a Dedicated Service Technician for Dupont Automotive Headquarters in Troy, MI for 12 years. He has also owned and operated an independent communications and networking firm providing data and voice solutions for 24 years. He is certified in the Avaya product lines and has 13 years experience with the NEC 2400 PBX.

**Michael Stoliker is an Expert in Forensic Audit.** Mike is a graduate of the University of Maryland. Mike brings a slightly different aspect of expertise to team because his experience was not gained in the telecommunications industry but rather as a Crypto/Linguist Analyst for the Air Force. Mike worked as a Russian language and code analyst for 12 years as an Air Force Non-Commissioned Officer. He has since represented clients for over 13 years as a telecommunications auditor and analyst.

MAS is further supplemented by a flexible team of specialists that can be called upon to help you at anytime from methodically planning and sizing Voice Over Internet Protocol (VOIP) or IP networks to installation of Wide Area (WAN) and Local Area (LAN) Networks. MAS can provide needed professional project support without compromising overhead and driving up fees.

MAS Audit & Analysis looks forward to working with you on your next telecommunications project.
