MAS Audit & Analysis

WHO ARE WE?

MAS Audit and Analysis (MAS) is an alliance of telecommunications professionals creating a team to meet all aspects of your operational needs. MAS' works as an extension of your telecommunications infrastructure to bring the specific talents you need when and where required.

Our team is headed by a trio of professionals with a combination of over 75 years of experience in the industry.

Our areas of expertise vary due to our diverse experience:

Our Primary Negotiator has over 24 years of experience in the telecom industry. His persistence and tenacity allows for the expert resolution of Audit Discrepancy Credit and Contract Negotiation. Our process allows for the successful attainment of your credit and pricing goals without damaging your vital relationship with the vendor.

Our Technical Expert brings 41 years expertise in all aspects of Data and Voice Transport Capabilities. His vast experience in the industry includes 20 years of PBX Installation and Repair for Michigan Bell (currently AT&T). He also represented AT&T as a Dedicated Service Technician for 12 years. He has also owned and operated an independent communications and networking firm providing data and voice solutions for 24 years. Another significant qualification is the fact he is certified in the Avaya product lines and has 13 years experience with the NEC 2400 PBX and InterTel.

Our Expert in Forensic Audit brings a slightly different aspect of expertise to the team because his experience was not gained in the telecommunications industry but rather as a Crypto/Linguist Analyst for the Air Force. He worked as a Russian language and code analyst for 12 years as an Air Force Non-Commissioned Officer. He has since represented clients for over 13 years as a telecommunications forensic auditor and analyst.

MAS is further supplemented by a flexible team of specialists that can be called upon at anytime to provide needed professional project support without compromising overhead and driving up fees.

MAS' completes its team with an industry leading Telecom Attorney on retainer in the event your organization has a need for that service.

MAS Audit & Analysis looks forward to working with you on your next telecommunications project.
